Capital Improvement Program

More than 100 Million Dollar Capital Improvement Program!
THE COMMUNITY

Known as the “Capital of Silicon Valley,” the City of San José plays a vital economic and cultural role anchoring the world’s leading region of innovation. Encompassing 178 square miles at the southern tip of the San Francisco Bay, San José is Northern California’s largest city and the 10th largest city in the nation. With more than one million residents, San José is one of the most diverse large cities in the United States. San Jose’s transformation into a global innovation center has resulted in one of the largest concentrations of technology companies and expertise in the world, including major tech headquarters like Cisco, Adobe, Samsung, and eBay as well as start-ups and advanced manufacturing.

San Jose’s quality of life is unsurpassed. Surrounded by the Diablo and Santa Cruz mountain ranges and enjoying an average of 300 days of sunshine a year, residents have easy access to the beaches along the California coast including Santa Cruz, Monterey, and Carmel; Yosemite and Lake Tahoe in the Sierra Nevada; local and Napa Valley wine country, and the rich cultural and recreational life of the entire Bay region.

San José has received accolades for its vibrant neighborhoods, healthy lifestyle, and diverse attractions from national media including Business Week and Money magazines. The downtown area is home to high-rise residential projects, theaters, museums, and diverse entertainment attractions such as live music, live theater, cafes, restaurants, and nightclubs. Inquiring minds are served by the Tech Museum of Innovation, the San José Museum of Art, and many local galleries and venues. Nineteen public school districts and over 300 private and parochial schools provide residents with a range of educational choices. Universities in and near the city include San José State University, Santa Clara University, Stanford University, and three University of California campuses.

In 2011, the City adopted Envision San José 2040, a long-term growth plan that sets forth a vision and a comprehensive road map to guide the City's anticipated growth through the year 2040. The Plan proactively directs significant anticipated growth in new homes and workplaces into transit-accessible, infill growth areas and supports evolution toward a more urban landscape and lifestyle. The San José area today is powered by one of the most highly educated and productive populations in America. More than 40% of the workforce has a bachelor’s degree or higher, compared with 25% nationally. Forty percent of San José residents are foreign born, and 50% speak a language other than English at home.

San José is proud of its rich cultural diversity and global connections, and the essential role the City plays in connecting residents and businesses to the nation and the world.

CITY GOVERNMENT

The City of San José is a full-service Charter City and operates under a Council-Manager form of government. The City Council consists of ten Council Members elected by district and a Mayor elected at large. The City Manager, who reports to the Council, and the executive team provide strategic leadership that supports the policymaking role of the Mayor and the City Council and motivates and challenges the organization to deliver high quality services that meet the community’s needs.

The City actively engages with members of the community through Council-appointed boards and commissions. In addition to providing a full range of municipal services including police and fire, San José operates an international airport, municipal water system, a regional wastewater treatment facility, over 200 neighborhood and regional parks, an accredited zoo, and a library system with 24 branches.
Commissioned in 1956, the RWF sits on approximately 2,600 acres, more than twice the size of Golden Gate Park in San Francisco, including bufferlands that are home to the largest population of western burrowing owls in the Bay Area. They are among dozens of animals, from bald eagles to leopard sharks, that live or hunt in the estuary. The cleanliness of the discharged wastewater contributes to the diversity of wildlife and fish in the South Bay.

The RWF serves eight cities and four sanitation districts:
- Cities of San José, Santa Clara and Milpitas
- Cupertino Sanitary District (Cupertino)
- West Valley Sanitation District (Campbell, Los Gatos, Monte Sereno and Saratoga)
- County of Santa Clara Sanitation District No. 2-3 (unincorporated)
- Burbank Sanitary District (unincorporated)

The RWF is one of the largest public works projects in the history of the South Bay. The Capital Improvement Program (CIP) division at the RWF is leading one of the largest public works programs in San Jose's history! The development of the adopted 10-year CIP was guided by the Plant Master Plan (PMP), which envisions over $2 billion in facility investments over 30 years and includes over 114 capital improvement projects focused on the long-term rehabilitation and modernization of the RWF which includes replacing aging infrastructure and updating treatment processes with exciting new technologies that will improve the reliability and operational flexibility of the facility. While all this planning and construction is on-going, the facility is in continuous operation, serving 1.4 million residents and over 17,000 businesses in eight cities.

Now in its sixth year, the CIP team is delivering more than two dozen critical projects as part of a 10-year, $1.4 billion construction effort that will upgrade the liquids and solids treatment facilities as well as power generation systems, pipes, buildings and other support infrastructure.

Successful delivery of this large, multidisciplinary CIP requires an integrated team of City staff, consultants, and contractors. The program is being delivered using a team of City staff from Environmental Services Department, Public Works Department, Planning, Building and Code Enforcement Department, Finance Department, and the City Attorney's Office, as well as program management consultant staff and various other consultant firms. Building the construction management team and tools continues to be a top priority as the CIP enters a two-to-three year peak period of.

POSITION

Under general direction, the Senior Engineer will be responsible for planning, directing, and managing professional and technical engineering work in support of the RWF CIP. This position reports to a Principal Engineer and will work closely with the Program Management Consultant (PMC) and Operations and Maintenance (O&M) staff in an integrated Program Management Office (PMO) to deliver a wide variety of capital improvement projects at the RWF. The Senior Engineer position is a management classification and will be responsible for supervising both in-house and consultant staff to deliver projects identified in the 2021-2025 CIP. These include but are not limited to: East Primaries Rehabilitation, Aeration Tanks Rehabilitation, Secondary Clarifiers Rehabilitation, Final Effluent Pump Station, Additional Digester Rehabilitation, and Site Facility Improvements (e.g. decommissioning, tunnel rehabilitation, etc.).

The Senior Engineer will serve as Project Manager through all phases of capital project planning and delivery from preliminary engineering/conceptual planning through start-up and commissioning for his/her assigned project(s). This includes defining project goals and objectives; developing the Project Work Plan; preparing consultant procurement documents (RFQs/RFPs) including contract negotiations and administration; evaluating technology selection and project alternatives; directing the preparation and approval of project deliverables such as business case analysis, conceptual design reports, preliminary design reports, detail design drawings and specifications, and engineer’s estimate of probable cost of construction (OPCCs); managing the project scope, schedule, and budget from start to finish; identifying and mitigating project risks; organizing project meetings and preparing monthly project performance reports; and providing engineering support through construction completion. The Senior Engineer will collaborate and work effectively with O&M staff, the City’s Planning Department, Fire Department, Public Works Department, City Manager’s Budget Office, City Attorney’s Office, and other stakeholders as required. The Senior Engineer will have overall responsibility for on-time and on-budget delivery of his/her assigned project(s).

The Senior Engineer will also participate in resource planning, staff recruitment and development, and the annual CIP budget process. He/she will be responsible for the hiring, training, developing, managing, and supervising professional engineering and technical support staff. The Senior Engineer will also work closely with program budget and controls teams to develop the annual staffing plan and five-year CIP budget and participate in ongoing program/project performance reporting.

ESD is seeking to fill multiple Senior Engineer positions in support of the CIP at the RWF. The CIP division is responsible for planning and implementing long-term capital improvement projects at the RWF. The division is currently comprised of 50 full-time positions that perform project delivery, program administration, budget planning, and process engineering services. The division is also supported by a co-located team of consultant staff and staff from the Department of Public Works who provide program management and construction management services, respectively. This integrated team is responsible for delivering complex and challenging capital projects that range in size from $5 million to more than $100 million, using traditional design-bid-build and newer design-build methods. The RWF CIP is an exciting opportunity that stands among one of the largest construction programs in the City and the South Bay with the most critical rehabilitation happening in the next 10 years and longer-term rehabilitation and process improvement projects, identified in the 30-year master plan, happening in the years to follow.

Combine your expertise with the on-the-job experience you’ll gain in CIP by working with a diverse, multi-discipline team engineering professionals to help rebuild a facility critical to the protection of the environment and the southern San Francisco Bay. You will enjoy work life balance, teambuilding, career development, new skills, mentoring, and the benefits of contributing to your community. The CIP recognizes that people have lives outside of work and offers flexible hours (earlier or later start times) to accommodate individual needs. The CIP values diversity and encourages an environment where people can interact with one another outside of their typical work assignments with events like bi-weekly breakfast gatherings, community volunteering opportunities, holiday gatherings, and after work socials. The CIP also believes strongly in career and professional development, providing monthly training to staff on a range of project management and program management topics, as well as opportunities to attend professional/industry conferences.

IDEAL CANDIDATE

The ideal candidate will possess in-depth working knowledge of the practices and principle of wastewater engineering with hands-on capital planning and design experience in one or more of the following areas: preliminary treatment, primary treatment, secondary biological nutrient removal, clarifier rehabilitation, tertiary filtration and disinfection, anaerobic digestion, co-thickening, and gas handling systems, mechanical dewatering, cogeneration, advanced automation and controls, and support buildings.
and utility systems infrastructure. He/she has actively participated in the development, review, and/or approval of engineering studies, design guidelines and standards, design criteria, equipment specifications, technology review and selection, equipment specification and costing, and construction bidding documents for wastewater treatment plant projects. Strong project management experience and familiarity with both traditional design-bid-build and progressive design-build delivery methods are highly desirable.

The ideal candidate will possess the following competencies, as demonstrated in past and current employment history. Desirable competencies for this position include: job expertise, collaboration, communication skills, leadership skills, problem solving, project management, and supervision.

**MINIMUM QUALIFICATIONS**

1. **Education:** Bachelor's degree from an accredited college or university in the field of Civil, Mechanical, Environmental, Chemical Engineering or a closely related field.

2. **Experience:** Five (5) years of progressively responsible professional engineering experience in the Civil, Mechanical, Environmental, Chemical Engineering or closely related field.

3. **Licenses or Certificates:** Professional Engineer Certification in Civil, Mechanical or Chemical Engineering. If P.E. from another state, a California P.E. must be obtained within one year of date of hire. Candidate must also possess or able to obtain a valid Class C California Driver License.

4. **Employment Eligibility:** Federal law requires all employees to provide verification of their eligibility to work in this country. Please be informed that the City of San Jose will NOT sponsor, represent or sign any documents related to visa applications/transfers for H1-B or any other type of visa which requires an employer application.

**COMPENSATION & BENEFITS**

The salary range for this position is **$115,939 - $146,640** annually. In addition to the starting salary, employees in this classification will also receive an approximate five percent (5%) on-going non-pensionable pay. The actual salary will depend upon the qualification and experience of the individual selected.

The salary is supplemented by an attractive benefits package that includes but is not limited to:

- **Retirement** – Competitive defined benefit retirement plan with full reciprocity with CalPERS; defined contribution plan available as an option.
- **Health Insurance** – The City contributes 85% towards the premium for the lowest cost non-deductible plan. There are several plan options.
- **Dental Insurance** – The City contributes 100% of the premium of the lowest priced plan for dental coverage.
- **Personal Time Off** – Vacation is accrued initially at the rate of three weeks per year with amounts increasing up to five weeks after 15 years of service. Executive Leave of 40 hours is granted annually and depending upon success in the Management Performance Program could increase to up to 80 hours. Sick Leave is accrued at the rate of 8 hours per month.
- **Holidays** – The City observes 14 paid holidays annually.

**Deferred Compensation** – The City offers an optional 457 Plan.

**Flexible Spending Accounts** – The City participates in Dependent Care Assistance and Medical Reimbursement Programs.

**Insurance** – The City provides a term life insurance policy equal to two times annual salary. Long-term disability and AD&D plans are optional.

**Employee Assistance Program** – The City provides a comprehensive range of services through EAP.

**Union** – This position is covered by the Association of Engineers and Architects (AEA), IFPTE Local 21, Unit 43 MOA. For further information about the MOA, follow this link: [https://www.sanjoseca.gov/home/showdocument?id=33348](https://www.sanjoseca.gov/home/showdocument?id=33348)

For more information on the employee benefits, visit the City's benefits website: [https://www.sanjoseca.gov/your-government/departments/human-resources/benefits](https://www.sanjoseca.gov/your-government/departments/human-resources/benefits)

**APPLICATION & SELECTION PROCESS**

The recruitment is open until filled with the first applicant screening occurring after **August 31, 2020**. To be considered for this challenging and rewarding career opportunity, please immediately submit your cover letter, resume, and list of six work-related references (two supervisors, two direct reports and two colleagues) at this webpage – [https://secure.cpshr.us/escandidate/JobDetail?ID=1675](https://secure.cpshr.us/escandidate/JobDetail?ID=1675).

References will not be contacted early in the process and advance notice will be provided to you before they are contacted.
